## Error in Fig. 1

In the article titled “Evaluating the efficacy of large language models in providing information for parental inquiries regarding primary care of pediatric oral and dental health” [1], published in March 2026, there is an error in the rendering of Fig. 1.

The correct Fig. 1 is as follows:

**Figure 1. Heatmap illustrating the accuracy scores (%) of four LLMs.** Kruskal-Wallis test + Dunn’s *post hoc* test (Bonferroni correction), (ChatGPT 4.0, Google Gemini, Microsoft Copilot, and DeepSeek-R1) across three major domains: Tooth eruption/Dental visits/Treatment needs (4 questions), Oral health (11 questions), and Diet (5 questions). Darker shades indicate higher accuracy percentages. Full numerical data are provided in **Supplementary Table 1**.

This correction addresses a formatting/layout issue during proofreading and does not affect the scientific content, data, results, prevalence findings, or conclusions of the article.
